Message From The Head Writer

Bradleys love for the movie footloose disappoints the people in the office #WYLION

What If God Was One of Us?

-Joan Osbourne

What if He wasn't Joan?

-Bradley Clark

How Would You Know?

-Culumbo

You Know what your probably right but hes either lazy or extremely bored of it all and...

-Bradley Clark's Genius

Now Being a fan of Comics I really Like the notion of being godlike as a writer.....but I'm not necessarily the best at it I'm just more Pro Active. This is one of many arguments of a writer trying to be modest in river of bullshit and self love.

Being a former conspiracy stoner i learned to question everything like why do we work for parchment paper, why is the paper more valuable than just helping people if we can. in theory I believe we are still the cavemen at the core... bickering over the rocks and shiny stones that ultimately distract us from dying as well as living while the whole tribe starves.

Now consumption is something i believe we are good at I mean its easy, in our nature..... should a stupid person eat? maybe? maybe not? who knows?

Human beings have convinced ourselves that what we do to our planet is important and the choices we make are of epic value.....which to be fair the ants are probably more informed than us i mean theres alot more of those mother lovers, they can fly and build stuff quickly.....

I digress my main point is that the only thing i know is that i know very little and seeing is believing.

Admittedly the moment an idea is outside the brain nowadays it becomes real to the eye fairly quickly. As others can then see/read that idea they can dispute that idea, love that idea, hate that idea

then before you know it your either a heretic or a saint for making it happen.

Now I'm not here to ram religion vitamins in your snack wrap or get you to drink or renounce the cool aid. if your happy and it makes you happy then be happy. I'm spiritual but i don't believe in organised religion I believe that certain things may of happened but were interpreted wrong or inaccurately.

As He Who Wins Writes the Book and you can not be right all the time just more consistent. But i digress Its a comedy of errors waiting to be explained badly and I Feel That can be achieved quite easily via the collective warped mind of the WYLION machine We have been building.

In the words of someone wiser than me

“You either laugh or cry at what life throws at you but eventually your eyes will hurt and you'll lose your voice.....being quiet is cool too.....are there any more malteasers left? i wanna eat some with this tube of Pringles Gonna make chocolate snack tacos”

-Stoner Guy at a Party I went to.....

All the Best

Bradley Clark

THE LIST

2

THE LIST: WRITTEN BY BRADLEY CLARK & JERMAINE HURLEY

Centered on Bobb. The Inventor of laziness and caretaker of the milky way.....he really really really shouldn't have the job or maybe he is perfect for it. Either way he's Bobb The creator of the current universe.

Learn everything you wanted to know about the universe but were probably not expecting through the eyes of Bobb.

The Meaning Of Life by John the Catfish

Our universe as we know it was invented by a group called The Collective aka The Committee. Who are responsible for the milky ways inhabitants. Which is seen as a nursery to the other universes.

Due to it infancy, or constant calamity... its currently running in safe mode where nothing goes completely extinct, as soon as the last two of any kind of thing is sent to the holding bay in Atlantis.

However due to an oversight the last 2 of any species become immortal and sent to the holding bay regardless of what sex is left.....

Resulting in awkward same sex companionships and outer species breeding resulting in human beings being created which essentially every remaining animal from the moment Bobb was given the job crafted in Bobb's frame work. Nobody knows who had the job before only that Billl may of had it at one point

(OK Who the FUCK is BOBB & Who The Fuck Is Billl?!?!)

I'm Getting to that.....this stuff is important

Only the 1st and last of any kind can exist in the holding bay at one time....as its the place of destruction and creation and acts as a back up....reset and.....to prevent another dinosaur style mass suicide....

Theres been alot of them However the Committee like dinosaurs.... (Damn That DRAGON) had 4 versions.....even gave them several planets...Saturn.....Uranus...Mars..... several species lost mainly due to a severe design flaw getting out of hand no back ups until Bob came along.....

The Plan: In order for Humans to survive longer than the dinosaurs Bobb Set Out to invent several religions in hopes that humans will guess theres no such thing or that not all of them can be true

The List: What Bobb has done, what he will do and what he has to deal with.

Factions Edited By Bobb

Dinosaurs

A badly designed predecessor to humanity often suicidal and anxious due to their high intelligence and inappropriate limbs. The committee was forced to abandon the design after several mass suicides sent them over the celestial budget resource wise..... some remain in the ark constantly threatening to kill themselves know full well they can't.....How I Love Safe Mode.

The Committee

a group of 12 beings that used to be on mount Olympus that debate the selling points of the Milky Way a new galaxy and potential tourist attraction. They pitch ideas to Me The caretaker then I make their designs reality and them to the chain. They have dabbled a bit in the life of mortals to make them more interesting but tend not to dabble too much as babying a species causes them to be over reliant. All 12 have 3 forms their real form, an animal form and their astral projection form..... a form which allows them to speak to a species on their level and not freak them out. Their animal forms are often used in the meeting room so that no major injuries are suffered during debates. and hardly anybody seen their real forms

The Myths

Before I was About there was Beast and Dinosaurs co-existing over the plains of Pangea. Beast such as griffins, minotaurs, Centuars, Dragons, huge Anocondas, krakkens and talking trees The majority of which stay within the ark and cross breed different species to be added to the chain.

The Everyman company

The Everyman company is a fleet of clones sent out into every era of time of human history in order for the plan to follow its course. Often affluent and have the surname Veryman. During your time there are 3 everymen due to the flux of activity over the last 100 years. Everymen cannot die but vanish after 100 years with the memories transferring to the next in line like a passing of a torchmade by Billl a caretaker twice before me **(Person Inbetween really messed things Up to the point i had to reset everything)** by doing so he broke the one of the main rules **(let them figure it out)** in turn he was demoted to scapegoat and is blamed for everything that goes wrong

The Guys

A Gift, A Burden, a new species a whole heap of problems. A lot of paperwork now i have to stay awake for the rest of my shift on the cycle

The Guys Problems

Meh too busy doing my list but if it gets too much i'll help those guys...the guys too

Places and Objects of Interest by Bobb

Atlantis: Atlantis stands in a pocket between reality and light and becomes visible every 2 thousand years to the naked eye (Naked People) Labelled as the Ark in the Past due to its role after the flood holding 2 of every animal part of the safe mode testing era of man's cycle (kind of like a fire drill but for a whole planet)

The Hub: a Place where Everything is made for use sort of like a garage also doubles up as a place where you can actually get a phone signal.

Holding Bay: a sort of airlock area where new species get transferred to upon creation whether internal, external dropped in or by accident or by joint ventures

The Book: a dimension where rules are made and etched into stone Tablet by Abraham, Mohammed and Jesus just kidding its just My diary..... which is in a dimension which holds Jesus, Mohammed, Abraham Buddha and Ganesh...so humans go cold turkey of this religion nonsense... Its fairly complicated but fits perfectly on my shelf

Bobb's Bed: Erm its a four poster memory foam has the most accurate amount of steps to the fridge, toilet and snacks making it proper....snoozy.

The Meeting Room: a Place where I Get told What To Do by small animals that argue amongst themselves.

Characters in Brief

Name: Bobb X (BX)

Alias: Mr Bobb, The Caretaker.

Bio: Bob The caretaker embed with the power of creation Bob has a Plan which is straying of course as he invented the lazy virus for humans not to develop so quickly as so that they last longer than dinosaurs and is all part of bobs plan... however in the holding bay he had no test subjects other than himself and subject him self to the serum before inventing the antidote the last Caretaker left our universe in a right mess. Dinosaur Bones everywhere no blueprints just putting it mildly it was a stressful 1st week....It was so stressful as time went on he realised that the universe inhabitants were acting strangely however with the universe in safe mode he can just take a nap....until something happens

Name: John the Catfish

Alias: Fin Grrs

Bio: is a female cat with gills that hates getting wet, doesn't eat fish particular about details... John is a relic of Bobb's old consciousness and was a result of curious non hungry cat jumping in water. As a further result an interspecies abomination cap was invented for class B species..... pets. Mainly as They have no real purpose in the scheme of things apart from John the worlds most focused and only real catfish.

Name: Bill Y (BY)

Alias: Horny, The Scapegoat, The Billl.

Bio: Billl is a Consultant to the caretaker....As he was The Caretaker held order over earth a Cycle before Bobb. Bill was Ousted after "The Incident" now he's Demoted to scapegoat a being of blame.... as everything happening now is his fault apparently. Nothing is known about Bill's past other than he was a lonely child. Obsessed with his appearance he invented the EGO a way of survival and finesse virus that make everything want to be better. which was meant to be used as part of His Plan. Much like Bobb when he tested it on himself he over did it thinking about everything down to the last detail in order for His "Plan" to go ahead. Knowing he was going to lose his "Job" after one Cycle Bill put what he likes to call safeguards in The Cycle. Unfortunately one thing he hadn't planned of is the lazy virus a simple but effective way of handling the Sentiant Trait of "Sadness" introduced by the Caretaker inbetween. The 2 Traits ego and Laziness merged to create religion which is similar to what killed the dinosaurs the only similar trait meaning the end of existence on the planet earth. Which is why The New Plan must work. Billl often tries to sort the major things before Bobb wakes up. But It's all a strain even for The Billl.

Name: Madam Magda

Alias: Too many to mention

Bio: The 1st ever whore in existence first bi product of ego vital to the plan... Her genetics in the human DNA timeline and are triggered by a compliment overdose. Now works as a permanent pa to john the catfish wants cash up front for everything and anything. Plans the office parties. Handles DNBE (Different and New Beast Effect) A Department With hardly any new activity.....

Name: Phil

Alias: The Name that no longer exists, My Cup

Bio: 1st human to suffer from religion a disease....builds 1st statue (idol) for Billl in hopes to communicate with him after Bobb saves a village from destruction by hovering up a hurricane. He prayed that his concept of money will help maintain order, Billl Agreed and gave him the power of money. Ironically Phil died of starvation as people didn't take to the idea well and revolted forcing him to lock himself in a vault. Phil Now works in the DBE (Domino & Butterfly Effect) Department In The Hub now. Does errands for Billl when on his "Breaks".

Name: Curtis The Tuna

Alias: Flakes

Bio: A Prehistoric Tuna with a loud mouth and loads to love works on Insects and Aquatic Deaths. Used to date a Flipper. Office Loud Mouth Has Hair, looks like a dolphin.

Name: Michael the Mannate

Alias: Wee Mikey Boy, Loch Ness, Nessie

Bio: Michael is a “Scottish” mannate that acts as a translator for Bobb. Goes to Loch Ness for her holidays run a successful global business despite originally being from Saturn. The committee second failed project. pitched as if the earth if it was bigger had more moons and a ring surrounding the dinosaurs would love it.... new design more stuff less sunshine and hayfever.....Yeah you guessed it Another “Lemon Mourning”. Saturn is now a Bird sanctuary.... Michael she was ok and survived due to her not moving when she should have done as she couldn’t be bothered. Bobb saw this and came up with the concept of lazy staying still out of choice which in turn stop the subject from wanting to end it all. Michael was relocated to earth and settled near glasgow due to their pleasurable outlook on life and as a result became an expert on human languages.

Name: Derek The Brontosaurus

Alias: Dee Bee

Bio: A She is Demetri's younger "Sister" We Say "Sister" as they were found next to each other....They Don't know if there are different breeds of dinosaur as they have no recollection of their past lives as living dinosaurs due to safe mode having to operate from a reset point after the event simply called "The Lemon Mourning" (Which Explains the notion of Lemmings) Where Every dinosaur on earth at the time decided to opt out collectively. Derek is non vegetarian which apparently was a life choice rather than a way of life and believes creatures deserve to have release kind of like a Reverse hippy but with good intentions.....It's weird but she believe she is helping them by eating them but completely understands their right not to be eaten... Other than that Derek is a carefree Fun Loving Dinosaur. The Rules later switched around the gender of names, due to her structure and easy going nature giraffes are invented.....with the help of El Bon Ba Bon.

Name: Demetri the Triceritops

Alias: Dee Tee

Bio: Demetri was the only dinosaur not to drink the cool aid.....ok she drank it last and was the only dino left standing during the mass suicide.....Being one of the last she was given the opportunity by Bill to no longer be a spinster who "accidentally" switched off the beastiality lock after being put under pressure from the Committee to make "changes" To The Boring, Blue and Green Planet. As a Result rhinos were Made with the Horned Stallion Bonnie and Demetri was later shocked to find Bonnie was "Unfaithful" With Her "Sister" due to Demetri's status in the universe she can not die (One of the last of her kind That Was Found) just glad she can have babies but hates the fact bonnie was "unfaithful" and wasn't happy with just her for eternity. Causing for them to constantly argue. In Spite Of This Bonnie Prefers her company as Derek Keeps Offering To Eat El Bon Bon Babon as Well as Her & His Babies....Other than that Lovely Dinosaur.

Name: Bonnie the unicorn

Alias: El Bon Bon Babon

Bio: a deflated sarcastic mythical being that cannot die...been living since the dinosaurs father to 10,000 rhinos and other subspecies constantly argues with Demetri due to his infidelity....She Is the Closest thing he has to a wife. Which he tells both of them (as well as other ladies of the flesh) its his Job and for the good of the universe....Which in his case is the truth. He just upset he and his gay annoying uncle survived the dinosaur self genocide rather than his wife so now he bones every thing.....female....Adding to his Don Juan complex which was actually him on his break.

Name: Erika The Unicorn

Alias: Ri Ri

Bio: Bonnie's Homo-sexual Uncle. As luck would have it despite the two were complaining about having an underground cave with no grazing area before the end happened with the dinosaurs. Living with the trolls actually saved their lives. As they are always standing in front of stuff expecting money acting as a mass troll like shield. Erika currently dates a Dodo called Ramone, Its very Passionate and noisy.

Name: Sanchez The Dodo

Alias: El Miserable, The Scoundrel

Bio: Has the swagger of fuck it and laughs at the pain of others, mainly due to him being raised by parrots raised by pirates. Single Handily got the rest of the dodo species to kill themselves. Sanchez was laughing all the way to the ark along with an egg which grew to be Ramone. Despite his genocidal practical jokes, being the only dodo that was self aware during it all, he tries to be a good dad to Ramone via tough love. As a result Ramone is the polar opposite and hates his non understanding “dad”.... who secretly loves him alot but won't let anybody else know.....If he can help it...

Name: Ramone The Dodo

Alias: Ram Bam

Bio: Currently dates Erika the Unicorn. Ramone is a complete enabler that is not even sure if he is gay but like to make things around him happy...Part of the Dodo Philosophy I suppose and due to his defiance of Sanchez. Which Often Leads him into situations he feels trapped in like his bad relationships before Erika.
